

POWERTRAK

Feature	Benefit
Slide block/packer track design	Low maintenance, less downtime, all wear parts easily changed in situ without major dis-assembly.
Available with Canbus electrical control system using leading edge J1939 industry standard protocols.	Unparalleled over load protection and capacity optimisation through Heil's Intelligent Density control (trade marked) option by integration with chassis suspension axle load indication.
Improved filtration high flow 6 micron filter	Maintains system integrity over extended service intervals.
Large hopper capacity - 2.3 cubic metres	Handles bulk items easily.
Tailgate hinge and inner slide pivot greased from outside hopper	Safe and easy maintenance.
Cylinders have case hardened rods	Superior resistance to damage.
Hardened pins and serviceable bronze bushings	Long life components with the ability to re-condition to as new.
Packing mechanism synchronised with bin lift	Maximises duty cycle while avoiding spillage.
8mm abrasion resistant steel hopper floor and sides	Best in industry for durability.
5mm high strength steel floor	Maintains flatness that leads to longer life by avoiding high spot breakthrough.
Front of body screened with mesh	Far safer than relying on rear of chassis cab to prevent operator access to dangerous areas. Prevents spillage onto engine components.
Body mounted using all flexible components	Prevents damage to body or chassis in rough road driving conditions.
All hydraulic pipes, fittings and fasteners are galvanised before being painted	Superior corrosion resistance extends service life and keeps your unit looking good for longer.
Separate hydraulic cylinders for tailgate lock	Provides secure, positive, latching of tailgate to prevent accidental openings.
Unique paint application process	Rust resistant, more durable paint finish extends service life and keeps your unit looking good for longer.
Certified IP65 rating on electrical components	Reliable and durable even in the most difficult environments.
Three year Gold Star warranty supported by Nationwide Network Service	
Training included in the price	Allows you to expertly maintain your vehicle thus ensuring optimum performance and longevity.
Ejector rollers are replaceable without removal of the ejector plate.	Ease of serviceability.
Any DIN mounted hoist frame or open back configuration available as standard.	Wide choice of hoist configurations to suit operational requirements.

CONTROLS

Electrically operated controls for compaction mechanism. All push buttons, relays, and switches are protected to IP65. Simple convenient near-side and off-side control panel incorporating emergency stop buttons.

SAFETY FEATURES INCLUDE

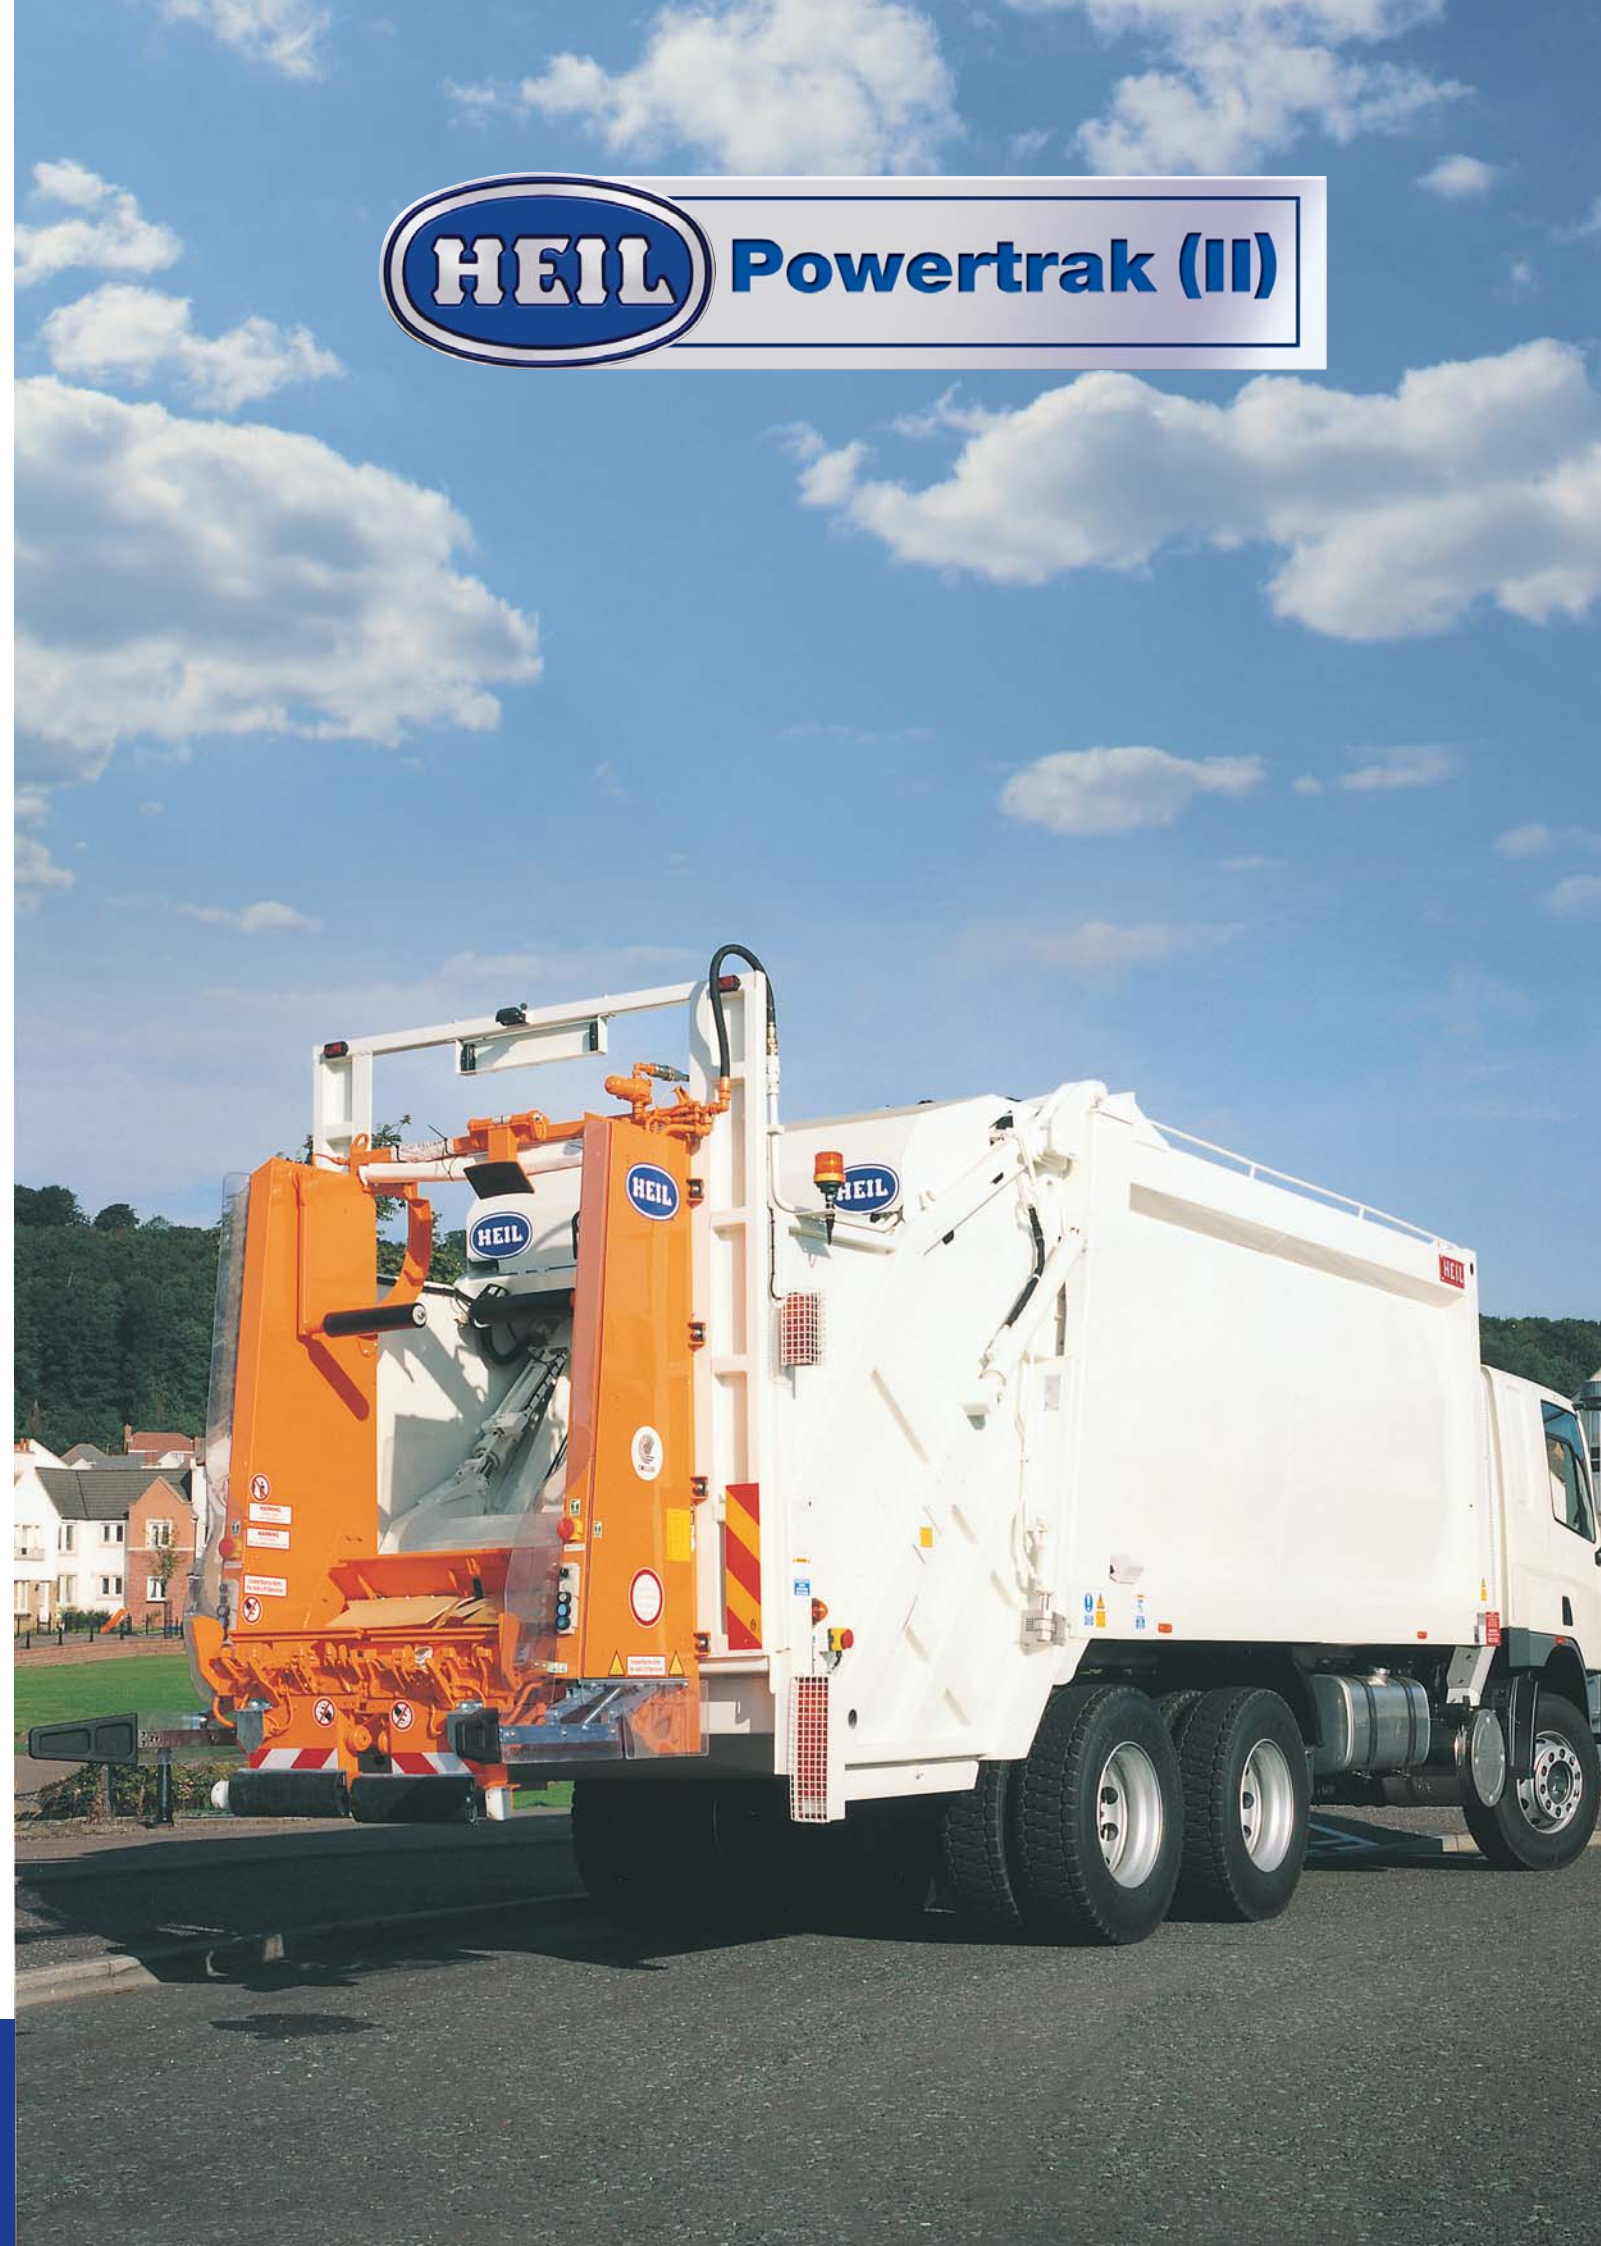

Full CE certification.
Audible tailgate raise warning system.
Amber warning beacons.

CHASSIS

The refuse collection body and equipment can be mounted onto any suitable 4, 6 or 8 wheeled chassis of the customer's choice.

OPTIONS:

Full range of options available including Heil Universal Trade Bin lifts with or without Paladin container lifting arms. Choice of body sizes 11, 14, 17, 19, 21, 22, 26m³. Narrow and standard widths available.

THE WHEELS ARE ALWAYS TURNING

HEIL EUROPE LIMITED

The new **Powertrak** is a robust and hard working refuse collection vehicle, designed for higher performance levels and lower cost of ownership.

The **Powertrak** offers low maintenance, less downtime and all wear parts can easily be

changed in situ without major dis-assembly.

Attractive in design, **Powertrak's** pre-formed, curved sides allow fitment of large customer decals without the need for sign boards.

With a hopper capacity of 2.3m³ the **Powertrak** can handle bulk materials easily and its superior corrosion resistance extends service life and keeps your unit looking good for longer. The **Powertrak** is

reliable and durable even in the most difficult environments.

All in all, **Powertrak** sets the future standards of RCV design and performance.
